

Teachers can plan a field trip with their students to visit the Nevada Southern Railway in historic Boulder City, the city that built the Hoover Dam.

Ride the rails with your students and experience history dating back to the 1930s when the track was laid by the Union Pacific Railroad to service the Boulder Dam project. The ride is a seven mile roundtrip to Railroad Pass and is approximately 40 minutes in duration.

School runs are held by reservation only on Thursdays and Fridays at 10 AM. Fares are \$5/person (one year of age and older).

For additional information or to make your reservation, please call Peg Franchetti at (702) 486-5006.
